

The rush of cloud computing, new applications, consolidation, virtualization, security and mobility have created unimaginable network problems. An annual network assessment is the best defense for maintaining a healthy network environment. With over 25 years of experience, Nth provides expert-level networking services. Nth's Network Consultants have tremendous knowledge of designing, implementing, operating, securing, analyzing, and managing networks of all varieties - from small LAN to Enterprise level customers. Nth's expertise and understanding of technology and business can help you in creating cost effective network efficiencies.

Nth's deliverables

- ➔ Nth's prepared Statement of Work (SOW) which details the project deliverables and affirms an understanding of client expectations.
- ➔ Nth's Statement of Network Requirements document which provides a road map for operation success.
- ➔ Nth's Network Proposal, including: Topology Map, Network Design, Local Traffic Pattern Analysis, Equipment Inventory, IP Addressing, VLANs/Layer II, Routing/Layer III, Bandwidth Bottleneck, Security, Physical/Logical Redundancy, Load Balancing, and Network Vulnerabilities.
- ➔ Nth's Assessment Report which documents all findings, identifies the gaps between actual design and user/business requirements, and offers recommendations for resolution.
- ➔ Potential additional Nth Reports which address network strengths, weaknesses and pain points.

Nth's Solutions

Expert in HP Networking and HP TippingPoint/ArcSight/Fortify, Cisco/HP Integration, Brocade, Palo Alto Networks, F5 Big-IP, and VMware.

Expert in End-To-End Network Redesign, Network Integration between DC, Campus, and Remote Offices, Network Troubleshooting, Network Performance, and Heterogeneous Network Environments.

Nth's Network Consultants are ready to develop contingency plans for network vulnerabilities, identify trends, and help with planning/implementation of short-term preventive maintenance and long-term strategic action.
