

PROTECT YOUR BUSINESS WITH A SECURITY RISK ASSESSMENT

Nth Generation CIS Top 20 Assessment

STEP-BY-STEP PROCESS & DELIVERABLES:

- An Nth Security expert explains every security control that the CIS Top 20 recommends
- A Gantt chart and heat map are created to help guide your organization to better align with this valuable framework and best practice
- Nth advocates for your organization as a consultant to move forward with better compliance

CyberArk DNA™ Assessment

KEY BENEFITS:

- Identify machines vulnerable to credential theft attacks
- Discover privileged accounts on-premises and in the cloud
- Assess privileged account security risks
- Identify accounts with local administrator rights

Cylance PROTECT® Proof of Concept Artificial Intelligence Endpoint Protection

KEY BENEFITS:

- PROTECT uses artificial intelligence and machine learning to identify and prevent malware attacks
- Cloud-based management console simplifies deployment and reduces operational overhead
- Lightweight agent only uses 1-3% of PC processing power

Darktrace Enterprise Immune System Assessment

KEY BENEFITS:

- Correlates unique “pattern of life” for every device and user on a network and spots threats
- Bayesian math allows for meaning to be drawn from large profuse data sets
- Darktrace automatically learns from an organization’s ongoing activity in real time to detect threat behaviors as they emerge

Fortinet Cyber Threat Assessment

KEY BENEFITS:

- Provides prospects with in-depth information about the current state of their network, covering key areas of security threats, productivity, and performance
- User productivity – application visibility control. Provides deep visibility into usage, as well as identifying users and devices, allowing you to set and enforce more granular policies
- Network utilization and performance – assesses what your requirements look like during peak hours and tests for performance optimization

LogRhythm® Risk Assessment

LEARN HOW TO:

- Practice threat scenarios inside an active real-world environment
- Navigate the LogRhythm web console using live data
- Create customized web dashboards
- Investigate security issues with focus on specific use-case scenarios
- Review log activities and alarm data

Varonis Risk Assessment

KEY FEATURES:

- Identifies and prioritizes at-risk areas like global access, stale data, and inconsistent permissions
- Discovers overexposed, sensitive, and classified data, including PII, HIPAA, PCI, and more
- Reviews access controls and authorization processes to find out where you can improve
- Analyzes file access to determine where you're most at-risk and easily reduces your risk profile
- Expose data vulnerabilities so that you can be confident in your data security

VMware Network Assessment - NSX Readiness

KEY BENEFITS:

- Gain insight into East-West traffic in your network, which represents security risk
- Get a preview of actionable NSX micro-segmentation recommendations for your network
- Opportunities to optimize network performance with VMware NSX
