

# PROTECT YOUR BUSINESS WITH NTH COMPLIMENTARY SECURITY ASSESSMENTS\*

## CIS Controls Gap Assessment

### STEP-BY-STEP PROCESS & DELIVERABLES:

- An Nth Security expert explains every security control recommended by the CIS Critical Security Controls
- A Gantt chart and heat map are created to help guide your organization to better align with this valuable framework and best practice
- Nth advocates for your organization as a consultant to move forward with better compliance

## LogRhythm® Security Intelligence Workshop

### LEARN HOW TO:

- Workshop schedule TBD
- Practice threat scenarios inside an active real-world environment
- Navigate the LogRhythm web console using live data
- Create customized web dashboards
- Investigate security issues with focus on specific use-case scenarios
- Review log activities and alarm data

## Varonis Risk Assessment

### KEY BENEFITS:

- Identifies and prioritizes at-risk areas like global access, stale data, and inconsistent permissions
- Discovers overexposed, sensitive, and classified data, including PII, HIPAA, PCI, and more
- Reviews access controls and authorization processes to discover how you can improve your system's security
- Analyzes file access to determine where you're most at-risk and easily reduces your risk profile
- Expose data vulnerabilities, so that you can be confident in your data security

## Proofpoint Security Assessment

### KEY BENEFITS:

- Gain visibility on threat exposure in your email, and social and mobile environments
- Uncover the advanced threat risk exposure of your organization, including malicious URLs and attachments
- Generates automatic scan report with meaningful metrics including number of mailboxes scanned, number of malicious messages found, top threats, and more

## CyberArk DNA™ Assessment

OTHER RELATED ASSESSMENTS

### KEY BENEFITS:

- Identify machines vulnerable to credential theft attacks
- Discover privileged accounts on-premises and in the cloud
- Assess privileged account security risks
- Identify accounts with local administrator rights

## Cylance PROTECT® Proof of Concept Artificial Intelligence Endpoint Protection

### KEY BENEFITS:

- PROTECT uses artificial intelligence and machine learning to identify and prevent malware attacks
- Cloud-based Management Console simplifies deployment and reduces operational overhead
- Lightweight Agent only uses 1-3% of PC processing power

## Darktrace Enterprise Immune System Assessment

### KEY BENEFITS:

- Correlates unique “pattern of life” for every device and user on a network to spot threats
- Using unsupervised learning, Darktrace identifies anomalies that would traditionally go undetected; and automatically learns from an organization’s ongoing activity in real time to detect threat behaviors as they emerge

## Fortinet Cyber Threat Assessment

### KEY BENEFITS:

- Next generation firewalls and a security fabric enabling a “single pane of glass” approach to a suite of leading security solutions
- ASIC-Based solutions providing greater density and speeds with a much stronger ROI than the competition
- Protecting the network with broad visibility, integrated detection, and automated response through the Security Fabric

## VMware Network Assessment - NSX Readiness

### KEY BENEFITS:

- Gain insight into security threatening East-West traffic in your network
- Get a preview of actionable NSX micro-segmentation recommendations for your network
- Opportunities to optimize network performance with VMware NSX
